

**Raptor** ...  
Touch POS System

Functional

Flexible

Friendly

**Raptor POS** for Windows XP/Vista is a complete Food and Beverages Management System designed to meet your objectives. Whether you are running a fine dining or a snack bar, Raptor POS System can be configured to meet your specific requirements. Raptor POS targets at being a total management solution for your company.

Raptor POS is an easy to use touch screen POS system that incorporates powerful management tools and features yet flexible enough to handle even the ever demanding operations of your establishment.

## FEATURES

### ✓ Easy-to-Use

Raptor POS System requires just a few simple screen touches to complete a transaction, enabling waiting time to be greatly reduced. Simple operation steps ensure a shorter training period for the staff.

### ✓ Functional

Raptor POS has fundamental functions vital for enhanced management :

- Clear menu display
- Respective prices and recipes of food items
- Respective bills
- Ready to print receipts
- Order taking display
- Message display to be relayed to preparation staff at real time
- Promotion and discount module

### ✓ Membership & Loyalty Point Module

Raptor POS Membership Module allows an effective tracking of customers' spending, frequency of visits and accumulation or redemption of loyalty points. This provides your establishment with an efficient marketing tool for execution of appropriate marketing strategies to incite higher spending and entice new customers.

### ✓ Wireless

Raptor PDA was developed for Raptor POS System which runs on a wireless interface to enhance mobility.

Raptor PDA promotes efficiency, speed and accuracy to greatly improve services. Orders can be sent straight to the kitchen without walking to the kitchen.

## ✔ Inventory Management

Raptor Inventory can be used to monitor stock movements, measure variances, determine cost of sales, and measure inventory usage by creating recipes from products. Having an efficient inventory system will help decrease food and beverage cost by decreasing wastages, and improving accountability.

## ✔ Split Bill Module

Split Bill Module allows table orders to be separated into individual bills. This feature facilitates payment for customers in big groups when they prefer individual payment of their orders. Going the extra mile with such value added service would impress customers. Hence customers' satisfaction could be further enhanced.

## ✔ Promotions & Discounts

Most restaurants are enticing customers with promotions and discounts. Raptor POS incorporates this module to eliminate mistakes and pilferages, as discounts and promotions are automatically deducted and executed upon ordering.

## ✔ SQL

Raptor POS uses the Microsoft SQL server to increase security, reliability, performance, and scalability in the demanding hospitality industry.

Raptor POS system runs perfectly whether you are running 2 or 60 terminals together. The database runs either in the background of any POS terminal or it can run on a dedicated server for high volume environments.

## ✔ Sales Consolidation

(Raptor HQ Lite, Raptor HQ Enterprise)

Consolidate your stores daily reports at the corporate head office, using encrypted communications via the Internet. Built in sales reports, item reports are available for viewing when required.

The ability to retrieve information from outlets hold the key to operating a more efficient and profitable business.

## ✔ Centralized Management

(Raptor HQ Enterprise)

Use the Internet to manage the exchange of information between the corporate head office and the chain stores. Raptor HQ seamlessly integrates enterprise management which includes corporate-driven menu management, PLU management, regional price maintenance, operator management, promotions management, and data warehousing. Raptor HQ also gives you the ability to program the POS systems for your entire chain from one central point. This gives you uniformity in programming, control of content and the ability to execute updates on a timely basis.

The tools used to add new "enterprise" information are identical to those that exist in Raptor POS backoffice, which means that you will not need to learn a different application in order to create or manage data from your headoffice.

Raptor HQ gives you the ability to control as much or as little information as you need. Create or manage entire menus, menu items, promotions and more from a single location, with the ability to choose the locations for this data easily and efficiently.

Complete control of your enterprise is within your reach, with Raptor HQ.

## ✔ Raptor Internet Server

(Raptor HQ Lite, Raptor HQ Enterprise)

With the use of Raptor Internet Server, we have developed an advanced 3-tier system which will ensure data integrity in low bandwidth areas. We are able to transfer data using modems without the use of high broadband lines like ADSL or Leased Line.

## ✔ Real Time Data

(Raptor HQ Lite, Raptor HQ Enterprise)

Real time data management can be done with the chain stores when required (requires the use of broadband lines, with minimum speed of 256 kbps).

## BENEFITS

### ✔ Perfect Solution

Raptor POS is a comprehensive system that makes operations in your establishment efficient. Ordering of items, stock inventory, and accounts management has never been easier! Savings can be reaped and little training is required.

### ✔ Cost Saving Solution

The Raptor POS System is an intelligent all-in-one solution that has all the fundamental features and benefits needed for the operation of hospitality establishments.

To increase loyalty and seize a larger slice of the market share, long-term investments and management strategies need to be taken into consideration. Raptor POS System is an affordable, functional, flexible and friendly system that can help managers achieve just that.

### ✔ Professional Reports

Raptor POS System has incorporated an extensive list of built-in reports:

- + Top 20 Sales Report
- + Daily Sales Report
- + Item Sales Report
- + Void Item and Refund Report
- + Discounts and FOC Report
- + Food Costing Report
- + Purchase Report
- + Shift Report
- + Operator Performance Report
- + Time Attendance Report
- + Members' Report
- + Profit and Loss Report
- + Media Collection Report

### ✔ Speed Ordering

Raptor PDA saves time and gives your staff the ability to interact with customers while providing quicker and more professional services. Orders will be taken with Raptor PDA which runs on wireless and transmitted real-time instantaneously to the respective preparation areas via printers for processing.

If you can now visualize your staff taking orders with Raptor PDA... Doesn't this professional look improve your corporate image too?

### ✔ Easy maintenance

Raptor POS virtually runs on itself! This system was designed to require minimal maintenance.

### ✔ Sales Consolidation with Raptor HQ

Raptor HQ will improve the management of your hospitality establishment with faster response time, on the fly updates and manage all the outlets with real time data transfer via broadband connection. Raptor HQ makes consolidating daily reports easy and convenient at the head office.

Ability to retrieve information from outlets holds the key to operating an efficient and profitable business.

### ✔ Technical Support

Raptor POS is committed to provide the best solution and support for the hospitality industry. We run a 24 hours x 7 days support team to provide an unsurpassed level of customer service.
